IRISES

SEASON OF 1930

• • •

The wonderful progress made in hybridizing the bearded iris has made it, probably, the most desirable garden plant of today. New colors and shades which beggar description. Improvements in form and substance. Increased height of stalk and size of bloom. To behold these beautiful creations means a desire for possession.

Herein is a small but selected list of new and outstanding varieties of modern irises grown in the wonderful Puget Sound country which nature has so generously endowed.

Shipments will be made from July 15th to October 31st. Good, strong, healthy rhizomes with a fine root system will be sent, properly labeled and packed, insuring their starting into vigorous growth when planted.

All varieties are true to name. Satisfactory adjustment will be made on any proving otherwise.

Prices quoted are prepaid on orders of \$2.00 and over. Under \$2.00, add 25c for postage.

Discounts: Except on collections and varieties marked Net, the following discounts are allowed: On orders of \$10.00 to \$25.00 discount 10%; orders of \$25.00 to \$50.00 discount 15%; orders over \$50.00 discount 20%.

Ratings: On the basis of 100 for perfection, ratings voted by members of the American Iris Society precede names of varieties. The first number is the exhibition rating, second number the garden rating.

As stock of many varieties in above collections is very limited, it will be advisable to order early. In the event of being sold out of any variety late in the season, I will either substitute a higher priced variety or refund the proportionate amount; or, I will consider customer's choice of a substitute and make the change if possible to do so.

All iris enthusiasts should join the American Iris Society, annual dues \$3.00, which includes four quarterly bulletins—these alone being worth the \$3.00. Send subscriptions to Mr. J. B. Wallace Jr., secretary, 129 Church St., New Haven, Conn., making checks payable to the American Iris Society.
